# The Yamaha Golf Car Brings You Home in Style

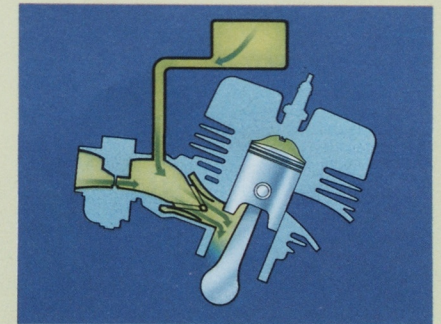

What's the reason for the Yamaha golf car's amazing efficiency, comfort, and reliability? In a word, technology. Yamaha has applied its experience and technical expertise in numerous fields to create the ideal vehicle for golfers. The newest advance is the Yamaha Energy Induction System (YEIS).

An exquisitely simple combustion chamber streamlines intake to increase efficiency and add even greater power to the proven low-rpm of the Torque Induction™ engine. A unique Autolube™ system ensures greater fuel efficiency, the exhaust system is super-quiet, and a CD ignition helps make the Yamaha golf car virtually maintenance-free. Driver comfort is guaranteed by an original front

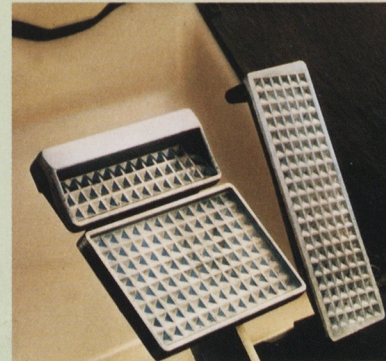

suspension unit while a tough, resilient cowl and steel bumpers give the riders plenty of protection. In fact, safety and convenience are built into each and every part of the Yamaha golf car, as evidenced by the unique double-duty key switch. Of course, the real goal of Yamaha technology is not to be seen or heard, but to give you pleasure. That's what the Yamaha golf car does par excellence.

## YEIS

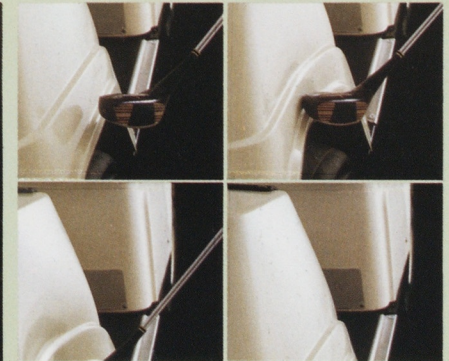

Yamaha's exclusive new Energy Induction System (YEIS) combines high torque at low speeds yet still saves on gas.

Steering wheel features large score card holder with accommodations for pencils and tees.

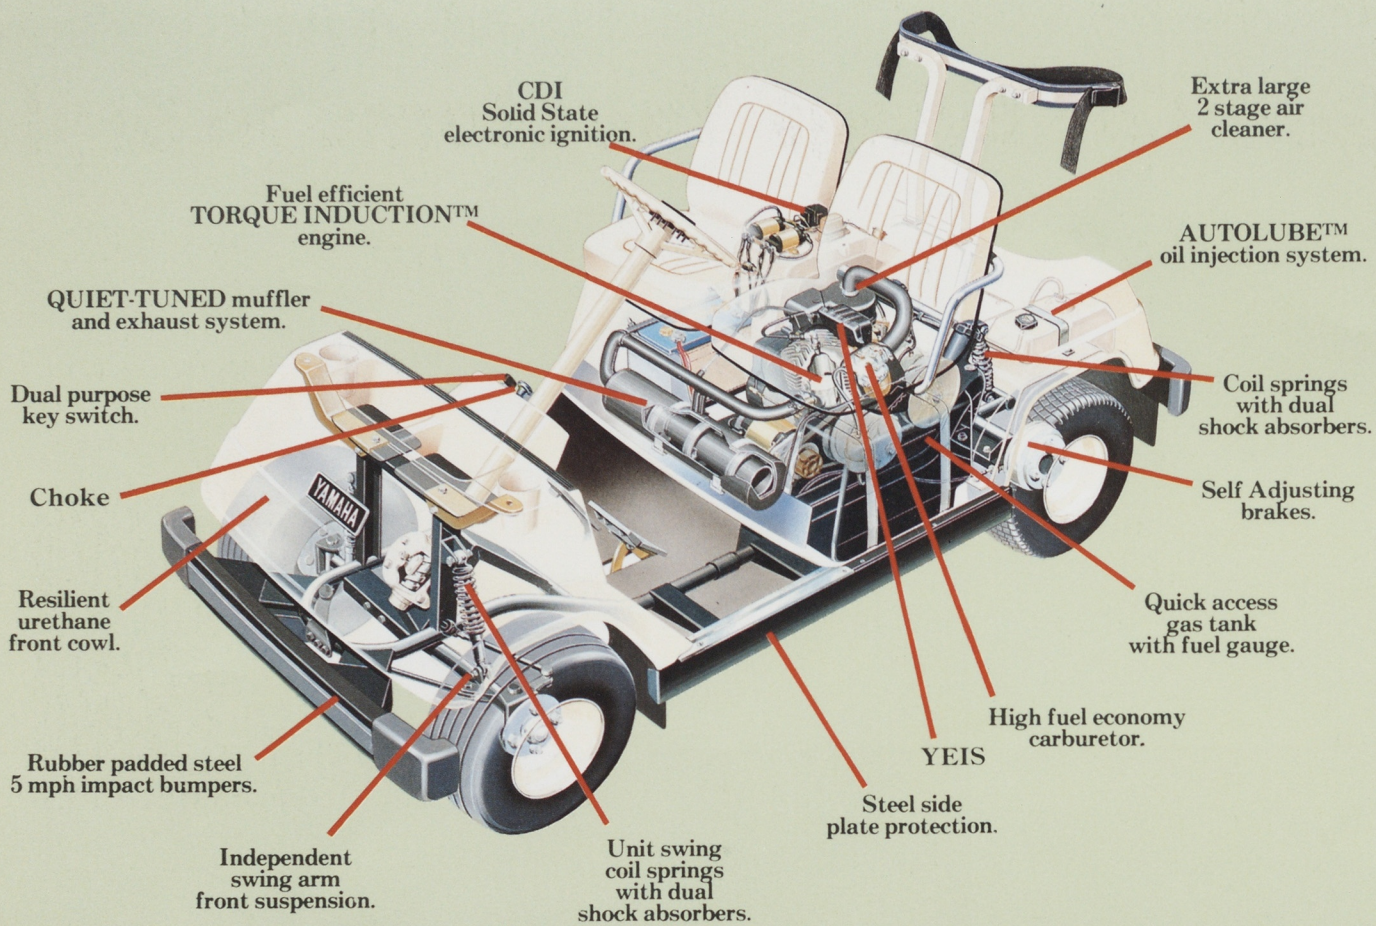

Extra large spike proof pedals. Stopping and parking brake combined on one pedal for simplest operation.

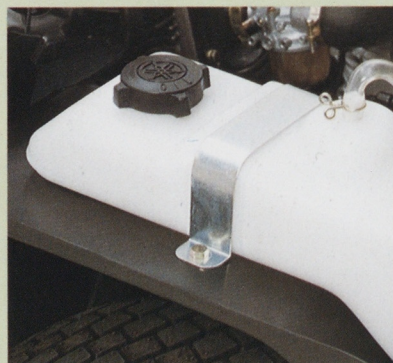

Tough, resilient front cowl will not chip or crack. Resin-injected high-impact urethane springs back to its original shape again and again in gruelling crash test trials.

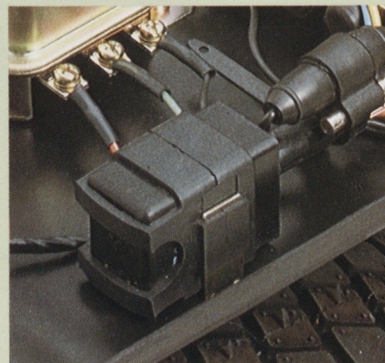

Exclus double elimin Directi preven running sounds

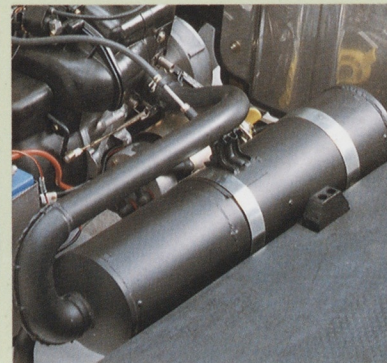

ive dash-mounted  
duty key switch  
ates confusion.  
onal changes are  
ted while engine is  
g. Warning horn  
s in reverse.

Exclusive AUTOLUBE.™  
No one else offers oil  
injection standard. Ends oil  
and gas premixing. Virtually  
no smoke or odor. Prolongs  
engine life.

CDI Solid State Ignition  
never needs a tune-up.  
No points to burn out.  
No condenser to replace.  
Timing never goes out.  
Another Yamaha first.

Exclusive: QUIET-TUNED  
exhaust system makes  
Yamaha the quietest gas car  
available today.
