

# Yamaha Snowmobile

## MODEL SL-350

### *Yamaha Takes You to the Heart of Snow Country*

Hop aboard Yamaha's new SL-350 Snowmobile and a new and exciting world of winter fun opens up to you. The snow is never too deep, the terrain is never too rough and the weather is never too cold to stop this sure-tracking 40 mph-plus traveler. Built by world-famous Yamaha to take the heartiest adventurers safely, dependably and in comfort to where the fish are biggest, the hills are highest and the snow is freshest — into the very heart of snow country.

Twin Engine, Twin Carburetor

## Dashing Through the Snow on Yamaha's SL-350

Underneath Yamaha Snowmobile's handsome fiber glass engine cover lies the secret of 40 mph-plus performance: two lightweight aluminum cylinders, each equipped with its own carburetor and starter jet. Together, they provide a maximum output of 20 HP at 5,500 r.p.m., a real avalanche of power. Cold weather full power starts are fast and easy, even in extremely low temperatures.

Access to the engine is easy too: the lightweight engine covers lift forward on hinges for quick engine maintenance.

### SPECIFICATIONS OF YAMAHA MODEL SL-350

#### Performance

Speed Range ..... 35~40 mph  
 Tractive Force ..... 260 lbs.

#### Engine

Bore & Stroke ..... 61 x 59.6 mm
